**Dr David van der Ham**

Gynecologist at the Martini Ziekenhuis Groningen, The Netherlands

"Now that we are using Fluent, I think a lot will change in the way we work. We can remove much larger pathology; so we must take that into account when planning procedures. You can really prevent 1 in 5 or 1 in 6 patients from an extra procedure, because you do not have to stop due to fluid absorption..."

A simplified set-up designed with the end-user in mind

The results of the European first-user experience show that 98% of procedures rated ease of set up as GOOD or VERY GOOD.

**Snr Nurse, Fionnuala Bragg**  
Barking, Havering & Redbridge University Hospitals NHS Trust

"I feel like I'm on holiday! I appreciate not having to bend down to set up or change canisters. Even the waste bag is well designed and easy to empty!"

**90%**

of nurses who are new to fluid management systems were able to set up the Fluent system in

**LESS THAN 1 MINUTE**

on average after a **single training session**.<sup>2</sup>

For nurses without prior fluid management experience, who successfully set up the Fluent and Aquilex systems on their first attempt, the average set-up time was **5x faster with the Fluent system versus the Aquilex system**.<sup>2</sup>

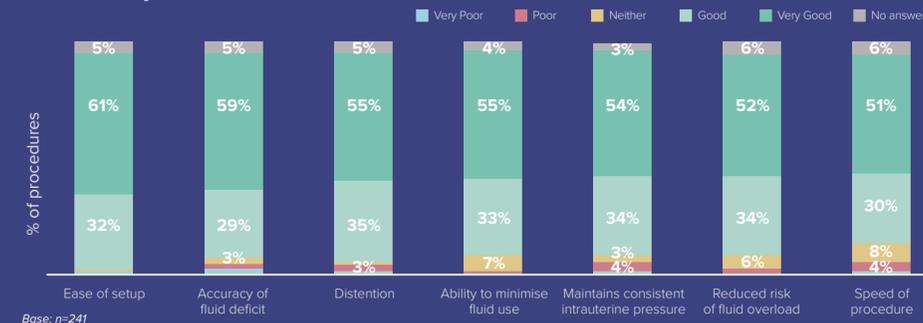

**3**

Enhanced control for better patient care\*

The majority of ratings by European users were considered GOOD or VERY GOOD for each assessed element of the procedure.
