

Panther® TRAX

The world's first fully automated Panther TRAX system for molecular diagnostics

Grow with Hologic. Panther TRAX: Five Reasons Why

INCREASE EFFICIENCY

Reducing touchpoints to the minimum. Manage your total molecular workflow with no need for manual routing of samples throughout the lab and its different rooms and instruments. Furthermore, the centralised location for loading samples minimises manual routing/sorting and reduces operator errors.

PEACE OF MIND

Automatic, intelligent sample sorting, archiving, tracing and storage. There is no need to sort and differentiate short-term and long-term archiving, meaning easy retrieval. There is also no need to search through archives for a sample to be re-run, reflex-tested or to run additional tests.

FULLY FLEXIBLE FOR A BETTER ROI

Increase your testing volumes without increasing staff. The additional budget needed to get your laboratory to fit the track is kept to a minimum. Our flexible track configurations reduce the need for infrastructure changes and additional costs associated with installation.

HIGHER EFFICACY

Hassle-free sample management. No need for upfront planning of samples routes and case-management scenarios. No need to look through checklists and large amounts of samples to check for tests run.

SUPPORTING LABORATORY GROWTH

Hologic Molecular Scalable Solutions offers you the flexibility & scalability to implement future requirements. Leverage your existing Panther investment by adding Panther Fusion®, Panther® Plus, Panther® Link or Panther TRAX.
